The Great Tech Purge

Step 1: Mapping out what technologies you are currently using in all areas of your business and why.

Understanding the current technology landscape of your business is essential for optimizing operations, enhancing efficiency, and driving growth. By mapping out the technologies used across all areas of the organization, businesses can gain valuable insights and take strategic actions to propel your success.

Business Development	Source & Attract	Assessment & Interview	Onboard

Automate	Pay & Bill	Report & Analyse	Communicate & Engage

Step 2: Identifying challenges and what your long term and short-term goals are.

For your business, any projects (implementations, adoption exercises, etc.) you may be working on and what the solutions are to help make you successful in these areas.

Company Overview

Priorities	Current Project

Challenges	Solution Ideas

Optimize, Consolidate, Implement

Map out what is low effort for you to change / adopt, as well as the impact to your business.

Low Effort - Immediate Result	High Effort - Immediate Result

Low Effort - Future State	High Effort - Future State
